

# Universal Stacking Chair Dolly

USCD75-STEEL

Made from heavy gauge steel, our new Universal Stacking Chair Dolly features a powder-coated black steel frame with flat-free tires.

From Chiavari Chairs to Banquet Chairs, this dolly accommodates them all. It also converts into a heavy duty hand truck so you can transport folding chairs, dishes, linens, etc.

This function also helps with storage space, as the bottom plate will also fold away so you can stack these dollies back to back on the warehouse floor or in the back of a truck.
